## Tactical Casualty Care Course

---

SWAT Officers are involved in high risk situations that have a high propensity for violence. With that violence comes the potential for catastrophic injuries to teammates, innocent bystanders and victims of a crime. This course is meant serve the needs of the SWAT Team or Warrant Service Team that might not have a "Tac Medic" assigned to their team. Our class is geared toward the "door kicker" with little to no tactical medical experience.

*This course is being led by our Lead Tactical Medicine Instructor, who has countless combat deployments as a decorated Special Operations Medic.*

---
